

AKCOMI CHESAPEAKES HEALTH GUARANTEE

We have endeavored to use the utmost care in selecting the proper stud dog and bitch for breeding to insure the best health, conformation, personality, and intelligence possible. The two most common health issues that affect Chesapeake Bay Retrievers are hip dysphasia and the eye disease PRA. Every thing possible has been done through testing to insure that this is a good breeding. Both parents have been x-rayed for hip and elbow dysphasia, tested for eye diseases including PRA and inherited cataracts, tested for DM (Degenerative Myelopathy) and EIC (Exercise Induced Collapse).

For verification purposes, copies of the parents' health clearances will be supplied to the buyer at the time of purchase.

We guarantee that the puppy purchased by you will be clear of the eye disease PRA/prcd and is not a carrier. Guaranteed to be non-affected by DM or EIC.

We guarantee that the puppy purchased by you will be clear of hip and elbow dysphasia for a period of **two and one half (2.5) years** from the whelping date.

If it has been verified by a medical professional and documentation supplied to the breeder that the puppy purchased develops hip dysphasia within **2.5 years** of whelping, the puppy will either be replaced or the purchase price refunded upon surrender of the affected animal. That decision will be solely at the discretion of the breeder. If the buyer decides to keep the puppy, and can provide documentation of spay/neuter, and upon independent verification of hip dysphasia by the breeder's veterinarian, the breeder will refund a portion of the original purchase price to the original buyer - \$300, instead of providing a replacement pup.

We guarantee that the puppy purchased by you is in good health and has been inspected by a licensed veterinarian. The buyer has **5 days** to have the puppy inspected by their veterinarian and if found ill, at the buyer's discretion, the puppy and documentation of illness will be returned to us and a full refund will be given.
